

JUSTHUMANRESOURCE

Client Proposal

A comprehensive HR, payroll, workflow, and performance management platform

Prepared For: Prospective Client

Prepared By: JustHumanResource Team

Date: 07 August 2026

One-off Payment

NGN 20,000,000.00

Implementation, deployment, configuration, launch support.

Annual Subscription

NGN 3,500,000.00

Annual access, maintenance updates, standard support.

This proposal presents the commercial and functional value of JustHumanResource for organizations seeking a secure, auditable, and workflow-driven HR management platform.

Executive Summary

JustHumanResource is a modern Human Resource Management System designed for organizations that need structure, transparency, compliance, and operational control across the full employee lifecycle. The platform brings HR operations, payroll, approvals, performance management, reporting, and employee self-service into one secure application.

The proposed engagement gives the client a production-ready HRMS that can improve process speed, reduce manual payroll risk, centralize employee data, and provide management with timely operational insight.

Commercial Proposal

One-off Implementation and Product Deployment

NGN 20,000,000.00

Covers product setup, deployment support, configuration, user onboarding, and launch assistance.

Annual Subscription

NGN 3,500,000.00

Covers annual product access, maintenance updates, standard support, and platform continuity.

Pricing is presented in Nigerian Naira. Taxes, third-party hosting, SMS/email gateway costs, payment gateway charges, and client-specific integration costs may be treated separately where applicable.

Core Product Modules

- Employee records, profile management, documents, bank details, and employment status tracking.
- Organization structure management for companies, departments, job grades, job steps, and pay groups.
- Employee onboarding workflow with structured verification and activation steps.
- Payroll setup for allowances, deductions, tax reliefs, pay groups, and statutory payroll rules.
- Payroll processing, payroll periods, payslips, audit logs, reconciliation, and reporting.
- Historical payroll adjustment support using versioned amendments while preserving original payroll figures.
- Performance management through KPI assignment, measurement, appraisal cycles, and reporting.

- Leave, workflow requests, approvals, and task management.
- Finance-facing payroll views including bank details, locked periods, approval, and posting workflows.

Key Selling Points

- End-to-end HR and payroll operations in one secure platform.
- Workflow-driven approvals using enterprise BPMN process orchestration.
- Audit-friendly payroll design with version history, original-vs-adjusted reporting, and traceability.
- Role-aware access control suitable for HR, Finance, managers, and employees.
- Modern web interface with employee-facing and mobile-oriented screens.
- Configurable payroll rules for allowances, deductions, pensions, PAYE, and pay groups.
- Integrated reporting for payroll summaries, statutory deductions, pension, PAYE, variance, and KPI outcomes.
- Built on a scalable Java 21 and Spring Boot architecture with PostgreSQL persistence.
- Secure authentication through OAuth2/OpenID Connect and Keycloak integration.
- API documentation via Swagger/OpenAPI for future integrations.

Feature Highlights

HR Administration

Centralized employee profiles, onboarding, position history, bank details, documents, departments, grades, steps, pay groups, and visibility controls.

Payroll Management

Payroll cycles, current and closed period control, employee payroll views, payslip generation, payroll item configuration, statutory deduction support, and payment workflow readiness.

Historical Payroll Adjustments

Closed-period payroll figures can be corrected through new payroll versions. The original figures remain available, while users can compare original and adjusted values at summary and line-item level.

Performance and KPI

Monthly and quarterly performance cycles, KPI assignment, measurement, appraisal workflows, scoring, scorecards, and management reports.

Workflow and Approvals

Flowable-powered workflows for onboarding, payroll approval, appraisal, requests, payroll closing, and related HR operations.

Security and Governance

Keycloak-backed authentication, role-sensitive views, audit logging, and controlled access patterns for HR and Finance operations.

Reports and Insights

Payroll summaries, PAYE and pension reports, variance reports, grouped pay item reports, KPI reports, and audit-focused historical payroll views.

Business Value To The Client

- Reduces manual spreadsheet dependency and payroll calculation errors.
- Improves management visibility across employees, payroll, performance, and approvals.
- Creates a stronger compliance posture through audit logs and versioned payroll records.
- Shortens HR processing time through structured workflows and self-service access.

- Supports future growth with modular architecture and API-ready design.

Proposed Scope Of Delivery

- Application deployment and environment configuration.
- Initial HR, payroll, organization structure, and user access configuration.
- Training for administrators and selected HR/Finance users.
- Support during initial go-live and stabilization period.
- Annual subscription support covering maintenance updates and standard product support.

Assumptions

- The client will provide required employee, payroll, department, job grade, pay group, and statutory setup data.
- Hosting infrastructure, domain, SMS, email, payment gateway, and identity provider credentials will be provided or separately procured.
- Any deep third-party integration, bespoke workflow, or custom regulatory report outside the current product scope may require separate estimation.
- The annual subscription begins from production go-live or another mutually agreed contract start date.

Investment Summary

Commercial Item	Amount
One-off implementation and product deployment	NGN 20,000,000.00
Annual subscription	NGN 3,500,000.00
Total first-year investment	NGN 23,500,000.00

Why JustHumanResource

JustHumanResource is positioned as a practical, enterprise-grade HRMS for organizations that want more than a basic personnel database. It combines payroll, approvals, employee lifecycle management, KPI performance, audit trails, and reporting into a single operational platform.

The strongest value is control: HR gains control of employee data, Finance gains control of payroll accuracy, management gains control of approvals and visibility, and the organization gains an auditable record of sensitive HR and payroll decisions.

Next Steps

- Review and approve the commercial proposal.
- Confirm implementation timeline, hosting approach, and responsible client stakeholders.
- Provide setup data and access requirements.
- Execute agreement and commence deployment planning.

Prepared on 07 August 2026.
